

ONCOLOGY Clinical Trials Unit

- Breast
- Melanoma
- Urology
- Gastrointestinal

594,000 potential Clinical Trial Patients

ONE HOSPITAL, FOUR LOCATIONS

Akershus University Hospital (Ahus) is a local and area hospital for **approximately 594,000 inhabitants** Potential Clinical Trial Patients can be enrolled from any of our four locations.

Additionally, national infrastructure enables nation-wide recruitment

Our Oncology Department conducts **29,000** Out-Patient consultations every year. **Clinical Trial enrollment is evaluated for all our patients**

NO PATIENTS LEFT BEHIND

Weekly multidisciplinary treatment meetings ensure that every eligible patient is offered the opportunity to enroll in one of the ongoing Clinical Trials at our Site

IN-PATIENT TREATMENT

Our Oncology In-Patient Unit simplifies classification, handling and reporting of Serious Adverse Events and enables Phase I Clinical Trials

MODERN MEDICAL IMAGING ON SITE

We have direct access to modern medical imaging equipment, for both diagnostic and interventional procedures. This allows protocol tailored Nuclear Medicine, CT, MRI, X-RAY and Ultrasound imaging

DEDICATED BIOENGINEERS

The Oncology Clinical Trials Unit collaborates with bioengineers specialized in preparation, collection and shipment of central laboratory samples in Clinical Trials

ADVANCED LABORATORIES ON SITE

AHUS Interdisciplinary laboratory medicine and medical biochemistry carry out laboratory investigations in the fields of medical biochemistry, pharmacology, medical immunology, allergology and infectious immunology. The laboratories is accredited according to the NS-EN ISO/IEC 15189 standard

PATHOLOGY DEPARTEMENT ON SITE

The department performs Cytological, Histological and Molecular genetic diagnostics and is accredited according to the EN-ISO 15189 standard

Clinical Trials in Norway

- Positive attitude towards healthcare research makes recruitment to Clinical Trials easier
- Unique national ID numbers makes survival and outcome data continuous and reliable

Governmental Action Plan

2021-2025

The number of ongoing Clinical Trials should be doubled, and at least 5% of patients in Secondary and Tertiary Health Care should be enrolled
